Dear Colleagues

We are working towards delivering a new vision for Adult Social Care Service in the London Borough of Waltham Forest. The vision requires new strategies, which we are working on, in conjunction with our partners, all of which have a greater emphasis on preventative models and promoting health and well being by providing more care closer to home in line with national policy.

It is important to us that all stakeholders are given the opportunity to comment and influence the final strategies. This will enable us to improve the experience of people who use our services, and achieve optimum value from the available resources. The way we deliver services is changing and both health and social services have to respond to the changes.

We are very committed to providing the best possible service for the residents of Waltham Forest and would therefore appreciate your views on the attached strategy. Thank you for your help.
